Description

General features:

- Protection cover for electrical components.
- Easy accessible battery connection terminals.
- Waterproof and latch lock connector for the control panel. A 100% guaranteed connection also in case of vibrations.
- Motor temperature protection switch.
- 5A circuit breaker for the control panel.
- Brass tail piece.
- Replaceable zinc or aluminium anode.
- Flexible coupling to absorb vibrations.
- Supplied with 1mm and 2mm gasket to center the propeller inside the tunnel.
- FAN for extra cooling.

Specifications:

Thrust Force	95 kgf
Tunnel Diameter	185 mm
Power	5,95 kW (8,1 kg)
Motor Type	12 VDC
Motor Temperature Switch	Yes
Operating Time	2 min/h
Current Consumption	640 A
Min. Battery Capacity	2 * 180 Ah
Main Fuse (ANL, Slow Blow)	425 A
Battery Cable	0 - 9 m / 95 mm ²
Terminals	9 - 12 m / 120 mm ²
Weight	M10 25 kg
