Description

Featuring support for Active Imaging™, FishReveal™ and built-in US Inland charts and Genesis Live onscreen mapping, the Elite-7 Ti² fishfinder/chartplotter is big enough for use as standalone display , but has a small enough footprint to be a perfect fit for boats with limited console space.

Professional Level Technology For All Anglers

Elite Ti² packs Active Imaging™, our highest quality sonar ever, FishReveal™, built-in Genesis Live real-time mapping and enhanced screen clarity and target separation. Plus, with features that make your life easier on the water, like an easy-to-use touchscreen, wireless networking, smartphone notifications and trolling motor/Power Pole® integration – Elite Ti² was designed to help you have an easier time finding fish.

NEW Active Imaging

Perfect for pinpointing fish-holding areas like rockpiles, standing timber, weedbeds, ditches and drop-offs, NEW Active Imaging™ sonar delivers the most superior clarity and the highest resolution images of fish and structure at a longer range than any other structure-imaging technology

Wireless Networking

For the first time ever with the Elite series, you won't need any cables to share sonar, mapping, waypoint and route data between Elite Ti² displays with the new wireless networking capability.

Mapping In Real-Time

Update the maps of your favorite fishing spot or map unmapped areas with ½ foot contours – in real time – on the screen of your fishfinder/chartplotter with C-MAP Genesis Live. Genesis Live uses digital depth to create high-definition maps featuring 1/2-foot contours. This level of detail makes it easy to find areas where fish like to hide, like drop-offs, points, and ditches. A truly customizable mapping experience, Genesis Live gives you control over contour transparency, contour density, depth and safety shading color palettes, and more. Create your Genesis Live maps in real-time, saving them as you go to a microSD card.

Preloaded High-Detail Mapping

Fish new water like a pro with preloaded US Inland mapping that features 4,000 lakes with 1-foot contours. The built-in map helps you narrow

your search for productive water by making it easier to locate fishing hot spots like ledges, drop offs and cover.

C-MAP® Easy Routing and Navionics® Dock-to-Dock Autorouting

Navigate faster and easier with automatic route planning. This menu-activated feature automatically plots the shortest and safest course based on a boat's draft, beam and height, creating a route around a landmass, shoals and other fixed navigational hazards. Requires C-MAP MAX-N+ charts, Navionics+ or Navionics Platinum charts.

Smartphone Notifications

Keep your eyes on the fish and never miss an important text or call with smartphone notifications built into Elite Ti². Turn off phone notifications for uninterrupted fishing, or leave them on to receive popup notifications on the screen of your Elite Ti² display.
